

# St. Regis Hotel

Client: ICT  
Consultant: KEO International / Neolight Design  
Contractor: EFFECO

Scope: Design, Supply, Installation, Supervision,  
Testing & Commissioning of Lighting Control System  
Time of Execution: 2 years

The St. Regis, Nation Towers has a high reputation to live up to when it comes to delivering excellent standards of service and splendour. Assisting the property, we deliver just that. Within the 283 rooms and the amazing Abu Dhabi Skybridge suite are dimming systems supplied and commissioned by Creation.

St. Regis as a chain has strict specifications for their interiors. Neolight Design, a global award-winning international Lighting Design consultancy were awarded the contract to create the necessary ambience befitting the St. Regis legacy of luxury.

To execute the brief, designers specified top of the range Evolution and eDIN series from Mode Lighting to create the desired effect. These in turn employed the entire spectrum of dimming protocols such as Phase, 0/1-10V, DALI, DSI and DMX to keep pace with the dynamic design.

The project took two years to complete. Even today, the quality and performance of the products and solutions adopted by us are testimony of our commitment to excellence.
