Creation

Lighting, Automation and Project Management

About Creation

Creation is a leading systems integrator and solutions provider of lighting, automation and guest room management systems. Project Management is another core area of excellence where our specialist engineers continuously monitor, maintain, retrofit and refurbish existing projects of lighting and automation systems at various facilities around the region. Creation has since inception, undertaken a variety of turnkey projects to include the design, supply, testing & commissioning, and maintenance of lighting and automation systems. Well reputed as a professional firm that excels in translating vision into reality, we attribute our success to a **customer-centric approach** that lays emphasis on delivering both - premium quality and consistent value.

Our distinctive line up of **over 500 successful projects** throughout the GCC and India feature luxurious hotels and palaces, designer homes for royalty and high networth individuals, restaurants, office complexes, retail shops and commercial & industrial establishments. We offer a wide range of aesthetically pleasing and technically advanced solutions to meet the needs of a diverse range of customer requirements.

Our specialized team of sales and service engineers are committed to delivering projects on time whilst keeping with the customer's requirements and budget guidelines. There's always a solution in sight once you reach **Creation**.

ISO 9001:2015 CERTIFICATION

“Delivering turnkey solutions that include design, supply, testing and commissioning of lighting, lighting control system and automation.”

6. ST. REGIS SAADIYAT

ADDRESS GRAND CREEK HARBOUR

Client: Emaar Properties PJSC

Consultant: KEO International Consultants

Main Contractor: ASGC

MEP Contractor: IEMSC LLC

Time of Execution: 8 weeks

Scope: Supply, Testing, and Commissioning of Light Fixtures & Lighting Control System

Address Creek Harbour by Emaar Hospitality Group introduced five-star luxury to Dubai Creek Harbour. Spanning two towers of 53 and 65 floors, it features 223 rooms, 794 serviced apartments, and an iconic observation bridge. Close to Dubai International Airport and the waterfront promenade, it offers world-class retail, dining, and entertainment.

Creation's scope encompassed the supply, testing, and commissioning of the complete lighting control system across public areas, corridors, landscaped zones, parking, and the façade. Helvar-based systems provide tailored

control for meeting and multipurpose rooms, boardrooms, prayer and dining areas, kids' play zone, fitness center, reception, wellness areas, and exterior landscapes. The entire network integrates with fire alarms and the Building Management System, supported by a custom graphical user interface for centralized monitoring.

A standout feature is the façade lighting, where multiple vertical linear lights, precisely managed through Pharos Architectural DMX controls, create a smooth transition of color and enhance the building's visual identity, underscoring Creation's expertise in advanced control solutions.

Lorem ipsum

BAB AL SHAMS DESERT RESORT

Client: Nakheel + Kerzner
Interior Designer: LW Design
Lighting Designer: Studio Lumen
Contractor: Khansaheb Group

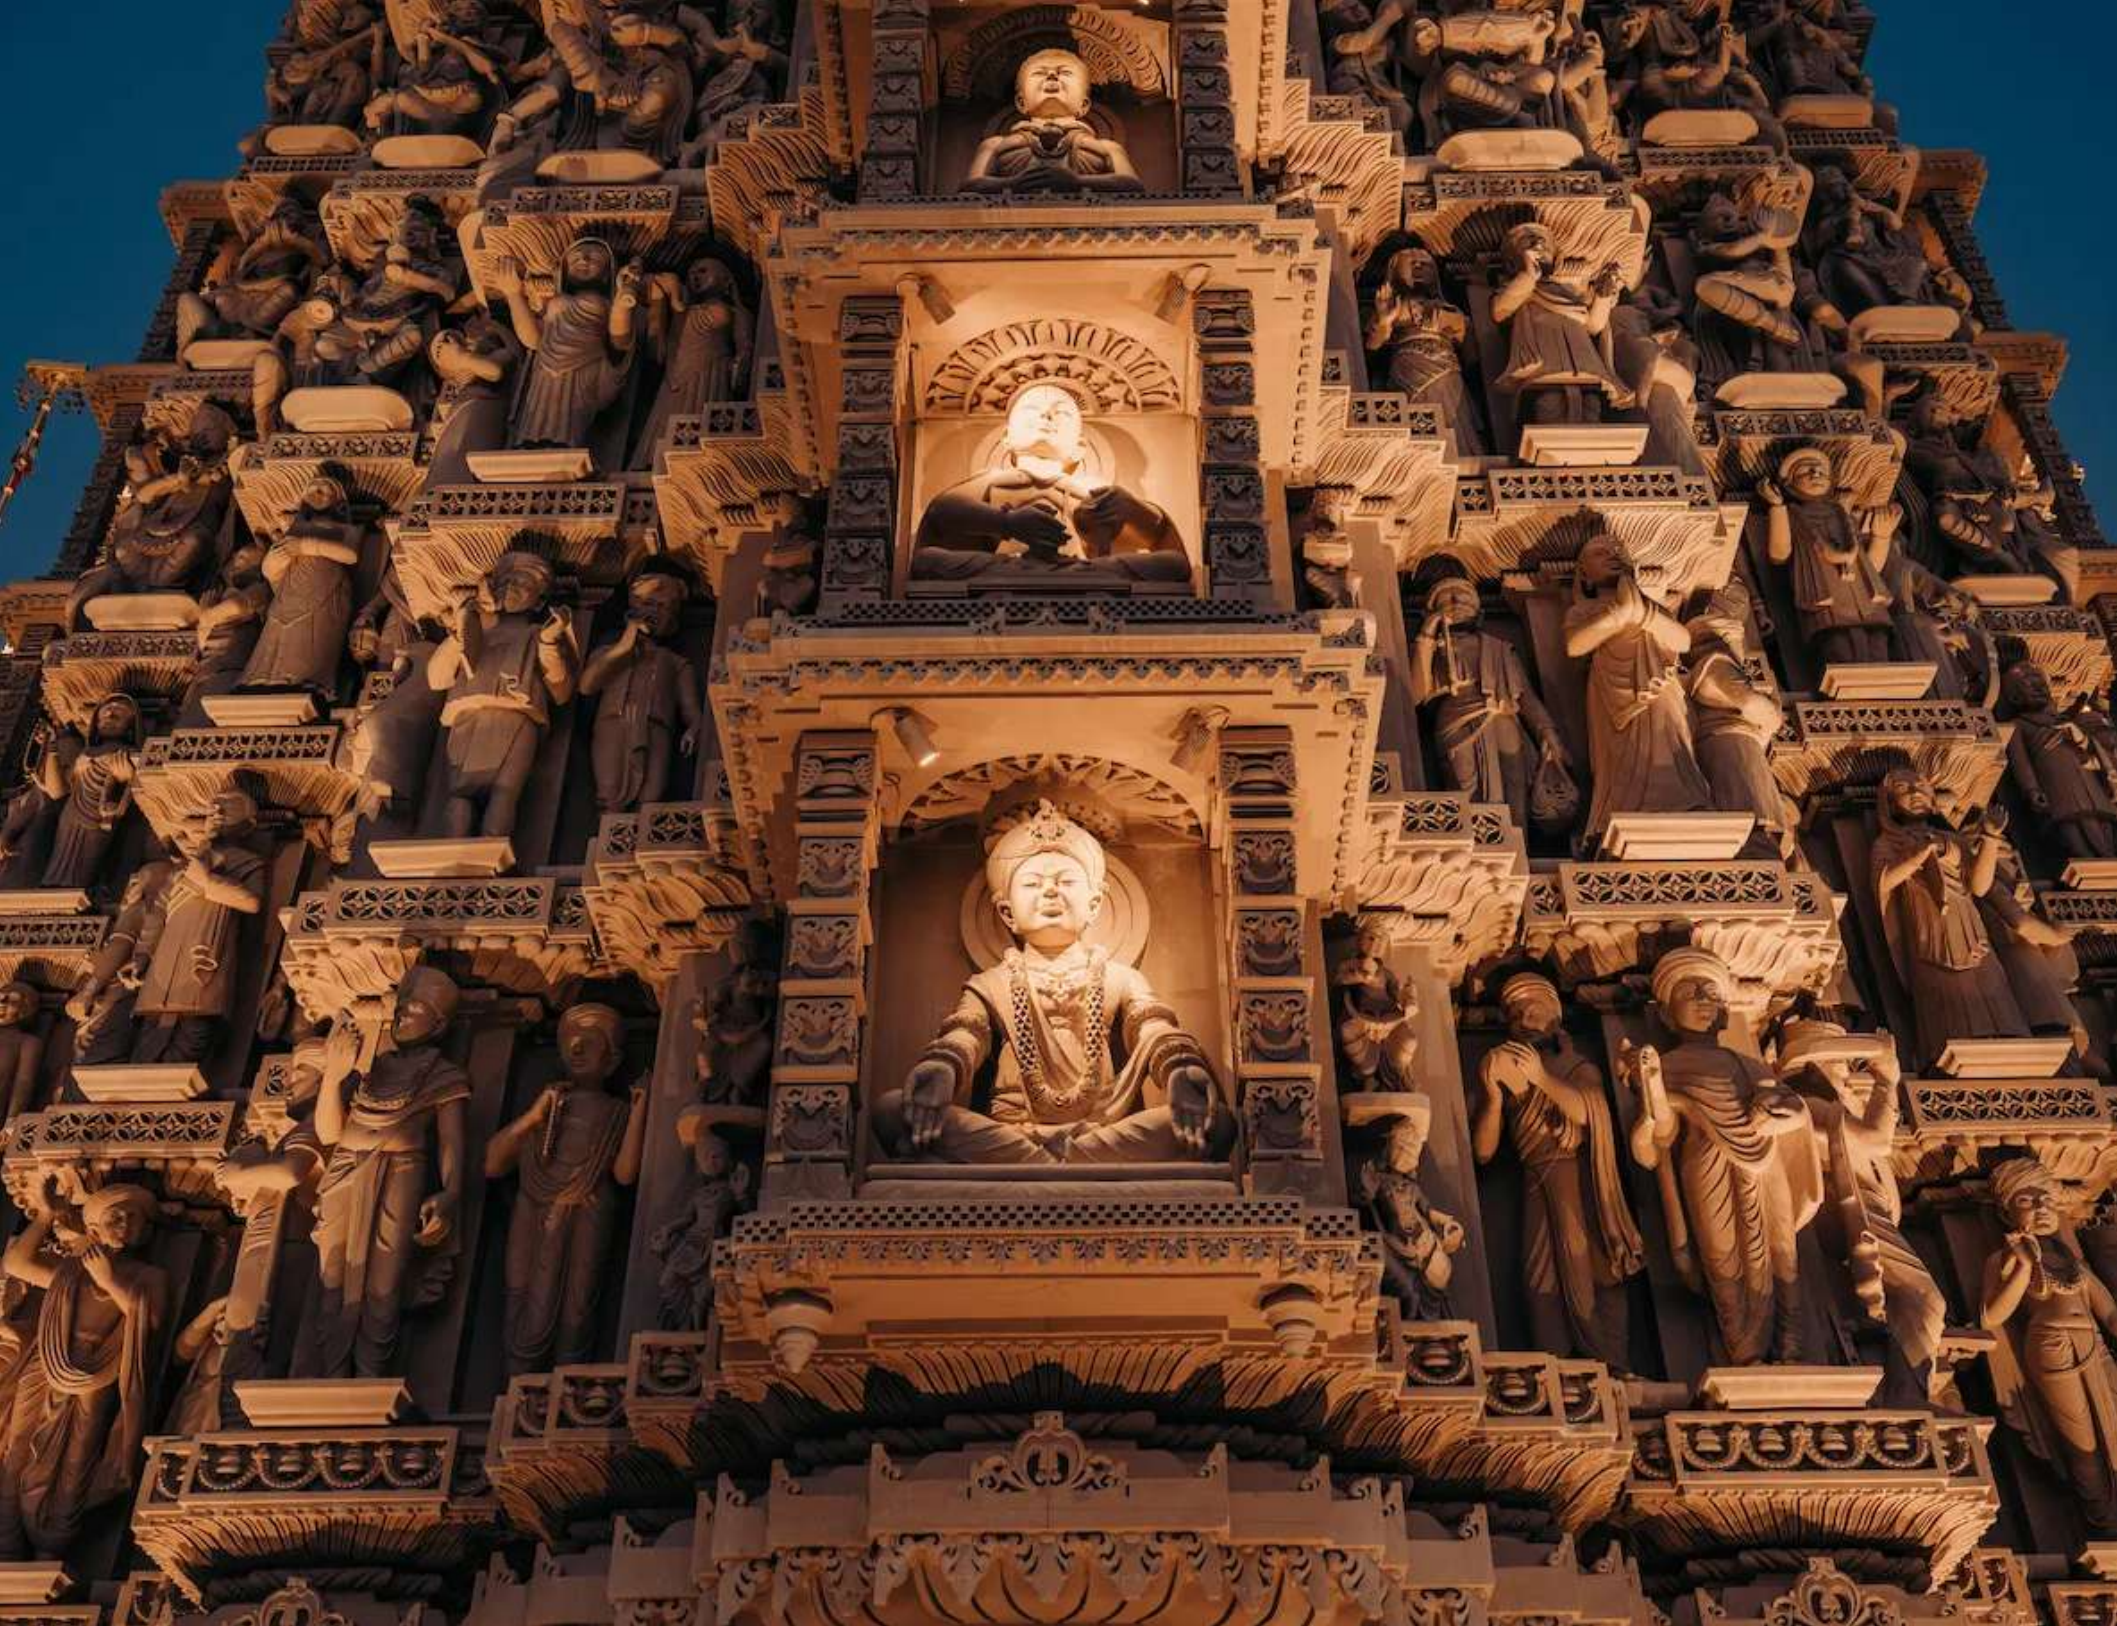

Time of Execution: 8 weeks
Scope: Supply, Installation, Testing, and Commissioning of Guest Room Management & Lighting Control Systems

Bab Al Shams Desert Resort offers an immersive desert escape just 45 minutes from Dubai's city center. Since its 2004 launch and recent refurbishment, it has remained the UAE's longest-running desert retreat.

The property features 115 rooms and suites across 16 low-rise buildings, complemented by vibrant dining, wellness offerings, and a tranquil landscaped oasis. To realize the design intent from LW Design to preserve the resort's heritage while blending contemporary Arabic influences, Creation was entrusted with the supply, installation, testing, and commissioning of the Guest Room Management System (GRMS), which included lighting controls for all 115 accommodations.

Lutron's myRoom Plus system was selected, giving guests intuitive control of lighting, temperature, and window treatments while enhancing energy efficiency through automation and integration with property management and door lock systems. The solution supports DALI, DMX, mains dimmable, and on/off fixtures, enabling tailored scenes for varying moods and times.

Through this integration of technology and tradition, Bab Al Shams now offers guests a refined desert experience that feels both authentic and contemporary, ensuring the resort's atmosphere remains true to its heritage while embracing innovation, securing its place as a benchmark for luxury desert hospitality in the UAE.

BAPS HINDU MANDIR

Client: BAPS

Lead Consultant: Capital Engineering Consultancy

Lighting Consultant: Studio Lumen

Main Contractor: Shapoorji Pallonji Mideast LLC

MEP Contractor: BEMCO LLC

Time of Execution: 8 months

Scope: Supply, Testing, and Commissioning of Light Fixtures & Lighting Control System

BAPS Mandir Abu Dhabi stands as a symbol of harmony and cultural unity, made possible through the vision of HH Sheikh Mohamed bin Zayed Al Nahyan, President of the UAE, and Hon. Prime Minister of India, Shri Narendra Modi. It is the region's first traditional stone temple and the largest in West Asia. With seven intricately carved spires representing the Emirates, the Mandir is celebrated as an icon of heritage and faith.

Creation's scope covered supply of light fixtures, complete lighting control systems, project management, testing, and commissioning for the temple and its landscaped surroundings.

Helvar-based DALI systems were applied across interiors and external areas, while Pharos DMX controls delivered dynamic brilliance to façades and special features such as a "river-flow" LED floor effect.

The project demanded flexibility to evolving design intents, with seamless teamwork enabling integration. Guided by Studio Lumen and supported by partners including OneEightyOne, Neko Lighting, NGA, Linealight, Enigma Lighting, Tryka, Simes, and UFO, the project was completed in just eight months. Today, the Mandir shines as a beacon of peace, inclusivity, and cultural pride.

INA RESTAURANT

Client: Fundamental Hospitality

Lighting Designer: Lighting Design Studio

Fit-Out Contractor: Finasi

Technology Partner: Procom Middle East

Time of Execution: 8 weeks

Scope: Supply, Testing, and Commissioning of Light Fixtures & Lighting Control System

INA by Fundamental Hospitality redefines luxury as an immersive experience where light and rhythm shape every moment. Creation was honored to deliver the intuitive lighting control system that brings this vision to life.

The brief demanded a familiar foundation enhanced with adaptability. Guided by Lighting Design Studio and supported by fit-out partner Finasi and technology specialists Procom Middle East, the solution was engineered for seamless performance.

Lighting was divided into architectural and dynamic zones, with Mode Lighting systems

providing structure and Madrix pixel-controlled installations delivering vibrant effects. Integration across Mode, Madrix, and GrandMA3 platforms formed a unified control network, enabling smooth shifts from ambient dining to high-energy events.

At the heart of INA, the main dining area transforms through meticulously programmed or manually triggered scenes, enhanced by a MIDI keyboard for real-time control. Today, INA stands as a landmark of immersive hospitality on J1 Beach—where precision lighting, dynamic adaptability, and seamless design converge to create an atmosphere that evolves effortlessly with every occasion.

SIRENE

Client: Fundamental Hospitality
Lighting Designer: Lighting Design Studio
Fit-Out Contractor: Finasi

Time of Execution: 8 weeks
Scope: Supply, Testing, and Commissioning of Light Fixtures & Lighting Control System

Spanning 9,000 square meters along Dubai's J1 Beach, Sirene by GAIA is the world's largest beach club. Part of Fundamental Hospitality's global expansion, Sirene blends Mediterranean charm with refined luxury, offering guests a seamless experience throughout the day like no other.

Brought to life by Evgeny Kuzin and Chef Izu Ani, with design by London-based studio First Within under Richard Saunders, the project required a lighting environment that could adapt fluidly with the rhythm of the day.

Creation delivered the complete lighting control

system, deploying trusted Mode Lighting solutions for flexibility and precision. A key feature was the integration of a 10-inch touchscreen interface, allowing intuitive zone-based control and multiple access levels without complex programming.

Every moment at Sirene is accentuated by light—bright and invigorating at sunrise, golden and warm at sunset, soft and intimate over dinner, and subtly dimmed for late-night relaxation. These seamless transitions ensure the ambience flows naturally with the rhythm of the day. Today, Sirene by GAIA stands as a landmark in immersive hospitality, where technology and ambience unite to craft a truly distinctive experience.

ST. REGIS SAADIYAT

Client: St. Regis
Technology Partners: Helvar
Lighting Partners: OneEightyOne

Scope: Supply, Installation, Testing, and Commissioning of Lighting Fixtures & Lighting Control Systems

The St. Regis Saadiyat Island Resort, Abu Dhabi, set along pristine shores, stands as a symbol of refined luxury where architecture and ambiance exist in perfect harmony. Tasked with revitalizing its public spaces, Creation delivered a comprehensive lighting upgrade that preserved the resort's visual identity while introducing sustainable, LED-based solutions.

Creation's scope covered the supply, installation, testing, and commissioning of lighting fixtures and control systems across key areas including the lobby and corridors, Manhattan Bar, meeting rooms, ballroom, and pre-function spaces. Tubeflex LED solutions from OneEightyOne were implemented to replicate the soft glow of traditional

cold-cathode lighting, while Helvar-based systems enabled seamless scene-setting, flexibility, and improved energy efficiency throughout.

Designed to complement the resort's Mediterranean-inspired interiors, the lighting interventions enhanced architectural features with precision and restraint, creating warmth, depth, and continuity across spaces. Delivered with minimal disruption and high adaptability, the project stands as a testament to thoughtful integration—elevating both operational efficiency and the overall guest experience while reinforcing the resort's timeless elegance.
